

Business owners are leaving a lot of money on the table when they hire employees.

Up to \$9,600 per hire.

The Department of Labor states that **26%** of full time employees in the United States will qualify for a tax credit this year.

COMPANIES MISS OUT ON TAX CREDITS BECAUSE THEY:

1

are unaware Federal (WOTC), State, & Local (SALT) hiring-based tax credits exist

2

are trying to tackle this process in-house

3

don't have personal advocates working on their behalf to communicate with tax credit entities

ON AVERAGE...

businesses see a **49%** certification rate, earning an average credit of **\$400** per eligible employee.

WITH EOS...

our clients see a **81%** certification rate, earning an average credit of **\$1,300** per eligible employee.

We tell a different story.

If you would like **\$900 - \$1,300** more than you are currently getting in tax credits for every new hire, reach out to learn more about EOS.
